Dall-E 2: cats learning C++ in the forest on '90's technology

MA

Help me write a "hello world" program in C++

c

 Copy code

```
#include <iostream>

int main() {
    std::cout << "Hello, World!" << std::endl;
    return 0;
}
```

MA

What does `iostream` refer to in that program?

"`iostream`" is a standard C++ library that provides input/output functionality, including the `cout` object used in the "Hello, World!" program.

MA

Write me a program that outputs "hello world" in C++

c

 Copy code

```
#include <iostream>

int main() {
    std::cout << "Hello, World!" << std::endl;
    return 0;
}
```

PYTHON:

```
print("You saw " + birdCount + " birds.")
```

```
#include <iostream>
using namespace std;
cout << "You saw " << birdCount << " birds." << endl;
```

source code (C++)

```
#include <iostream>

int main() {
    std::cout << "Hello, World";
    return 0;
}
```
